**Industrial sector, RLNG supply to be restored on Tuesday**

LAHORE: It has been decided to restore RLNG supply to industrial sector from Tuesday, December 31, 2019.

This decision has been taken because of resumption in gas supplies from MOL gas field as well as increased RLNG supplies. Reconnection of CNG stations will be carried out following the resumption of supplies to industrial consumers. These curtailments were necessitated owing to record low December temperatures arising from climate change on which company has no control.

Supply of RLNG to domestic consumers has exceeded 500 MMCFD in the last week of December against the average December 18 consumption of only 150 MMCFD owing to severe weather change.

The company is undertaking all efforts to ensure supply of gas to high priority domestic consumers.
