

Industry demands separate gas lines

KARACHI: The Site Association of Industry (SAI) on Wednesday urged the Sui Southern Gas Company Limited to end Sunday gas closure for industries, improve gas load management system and provide required gas pressure for industrial production to continue smoothly.

In a statement, President SAI Saleem Parekh said a shared gas pipeline for industries and CNG stations in Site was the reason behind low gas pressure.

On days when CNG stations remain open, hardly 30 per cent of the industries manage to run on low gas pressure which hurts industrial productivity, he said.
