

KE charges - Newspaper - DAWN.COM

 dawn.com/news/1561646/ke-charges

June 6, 2020

AS oil prices dropped in the world markets, our government was considerate enough to pass on its benefit to the people to provide some financial relief.

However, K-Electric, instead of reducing electricity rates, keeping in mind that the furnace oil price has decreased, is continuously imposing additional fuel adjustment charges each month, making millions.

I hope that someone in Nepra or the ministry of power will look into this matter and stop this daylight robbery.
