

## Weekly holidays

Page No.09 Col No.05

**DUE to the shortage of electricity, Saturday was also declared as holiday for all banks and government departments. It created many problems especially while dealing with banks, import, export, shipping dealings etc.**

Now since electricity production has sufficiently increased, I think we can revert to the old system of holiday on Sunday and a half day on Friday.

The new government should consider these suggestions to enhance productivity in the country.
